2019 PMP[®] Exam Content Crossover Map

This document is a current mapping the PMI Certification team is using to determine what existing inventory can be reused in the new exam. There are sections that are brand new to the exam and will need to have content created. This mapping document is intended to help you get started to update your course. Along with the ECO the mapping document will be one of many resources that PMI will provide in the upcoming months to help you update your coursework to help students prepare for the new PMP® Exam starting in December. In order to help you better we are asking you to reach out to tara.leparulo@pmi.org to tell her what resources would be helpful as you update your coursework. Where possible we will provide what we can in order to make the transition to the new exam easier.

Domain Content Location

People: Your current course may have limited content to address this new domain. If there is content it would be woven throughout your course. 42% of the exam questions will be based upon this domain.

Process: Your current course may have a fair amount of content to address this new domain as this was the bulk of the exam previously. 50% of the exam will be based upon this domain.

Business Environment: Your current course may have very limited content to address this new domain. If there is content it would be woven in small threads throughout your course. 8% of the exam questions will be based upon this domain.
